

Always Shake that Drink!!!

If you are looking for a bartender, one tell-tale sign of his/her skills is whether or not he/she shakes his margarita. Ask how the bartender their recipe for a margarita. If they do not mention that “shake” it, do not hire them. Shaken margaritas are full of flavor and character. Margaritas that are not shaken taste flat and have no substance.

Bartenders who will not shake their drinks should serve as a sign that they either cannot bartend or are just plain lazy! Either way, stay away!
